

# **Clinigence MSSP Registry – Train-the-Trainer PY2020**

# Agenda

- ▶ The ACO Reporting Timeline
- ▶ The Clinigence MSSP Submission Process
- ▶ The Clinigence MSSP Registry
- ▶ The Collection Process
  - Entering the data
  - Approving the data
- ▶ Data Entry Reports
- ▶ CMS Support Calls
- ▶ Next Steps

# ACO Reporting Timeline

## ▶ **November 8, 2020 – November 30, 2020**

- ACO completes the organization census of providers, practices, TINs and NPIs.
- ACO and Clinigence establish the EIDM Web Interface Submitter roles.

## ▶ **January 4, 2021**

- Clinigence downloads the Beneficiary Sample file from the CMS Web Interface.

## ▶ **January 4, 2021**

- CMS Web Interface becomes available. Clinigence Registry users do not need to log in to the CMS Web Interface, but can do so to monitor their progress.

# ACO Reporting Timeline

- ▶ **January 7, 2021 (tentative)**
  - Clinigence MSSP Registry end-user training
- ▶ **January 4 - January 11, 2021**
  - Clinigence loads the sample list into the Registry.
  - Clinigence assigns beneficiaries to practices and providers using the sample list data, the ACO-provided organization census, and for integrated practices - clinical data.
  - Integrated practices only: Clinigence pre-populates the responses in the registry using the extracted EMR data or other data feeds.
  - ACOs train the registry users and set up user credentials.

# ACO Reporting Timeline

## ▶ January 11 – January 20, 2021

- Clinigence MSSP Registry becomes available for chart abstraction.  
**Clinigence will notify each ACO as their Registry becomes available.**

## ▶ January 11-20 - March 31, 2021

- ACO's use the Clinigence Registry to collect and approve their data.
- If there are problems during the collection phase, submit your issues at support.clinigence.com or via email to [support@clinigence.com](mailto:support@clinigence.com).

**NOTE:** If the issue pertains to a specific patient you **must** go to the support site to enter patient information. Email is not HIPAA-compliant. Please identify the patient using the Patient ID, not the CMS Id.

# ACO Reporting Timeline

## ▶ **February 5, February 19, March 5, 2021**

- Clinigence uses the data in the Registry and the CMS-provided claims-based data to test export and submission to CMS.
- Clinigence provides interim submission reports and performance reports.

## ▶ **March 17, 2021**

- **Target date for ACOs to complete chart abstractions.** This gives us a few days to confirm that all chart abstractions needed are complete and resolve any errors found during submission.

## ▶ **March 17 – 31, 2021**

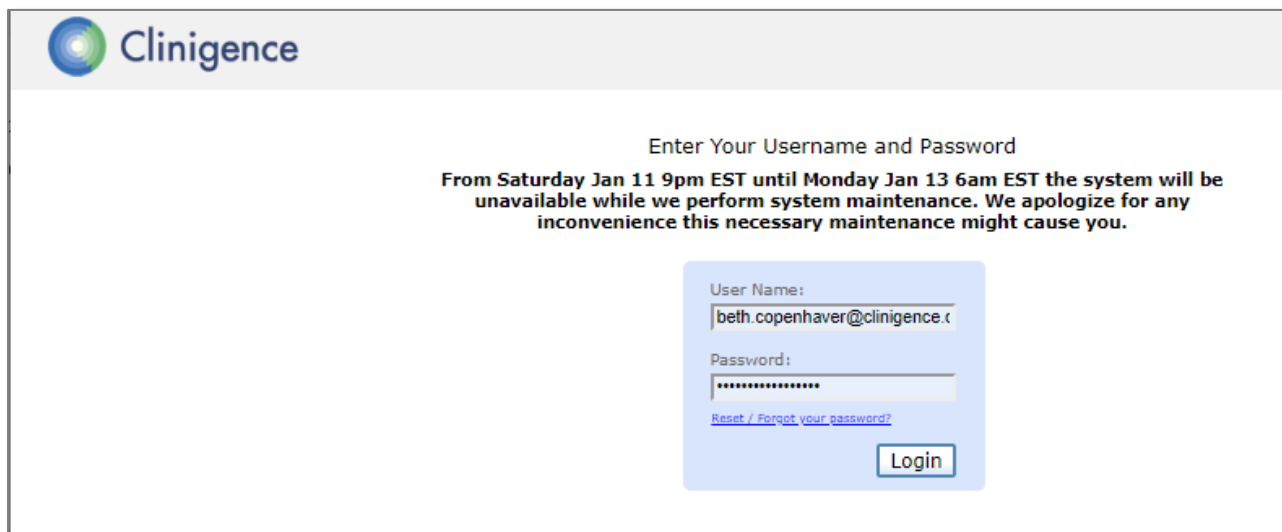

- Clinigence performs the final submission and disables the Save feature in the Registry. We can submit as many times as needed, but only the final submission is used.
- ACO's have this period to correct any errors they may notice.

# ACO Reporting Timeline

- ▶ **March 31, 2021, 8 pm ET**
  - All data must be submitted in the CMS Web Interface.
- ▶ **April 1 - 30, 2021**
  - Clinigence exports all data and reports from CMS Web Interface for future reference.
  - Clinigence generates and delivers final submission packets.

# A Note About System Maintenance

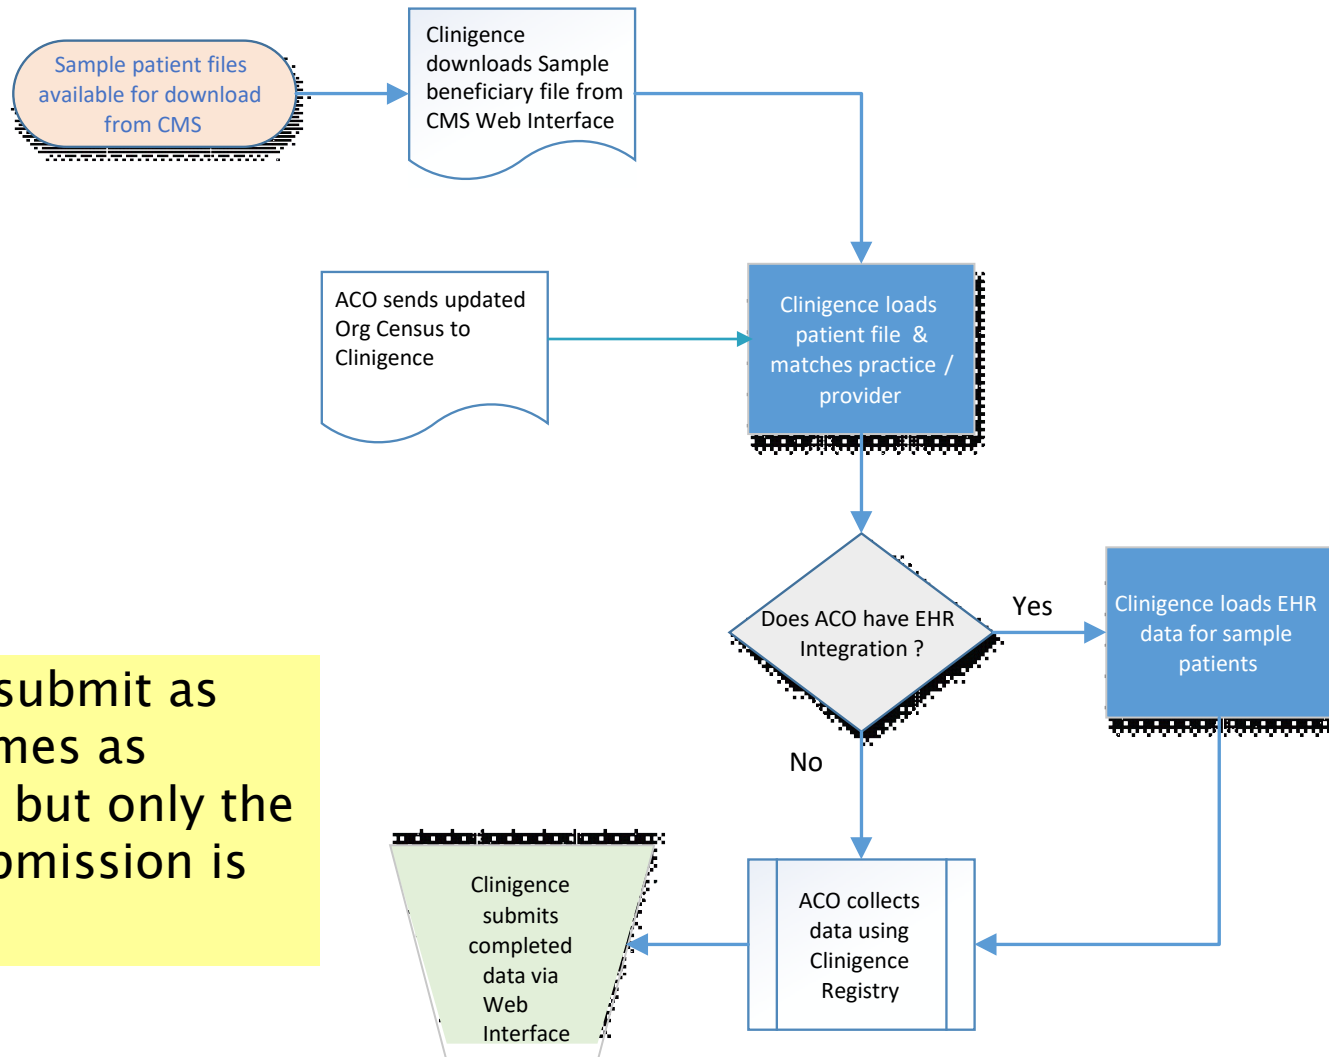

- ▶ During the MSSP reporting period, Clinigence will need to run system maintenance and back-ups. These are scheduled to run during the weekends, generally Sundays. The Registry will be unavailable during that time.
- ▶ When we expect that maintenance will take longer, a maintenance notice will be posted on the log in screen by Thursday so that you can plan accordingly.

The screenshot shows the Clinigence login interface. At the top left is the Clinigence logo. Below it, the text "Enter Your Username and Password" is centered. A maintenance notice is displayed in the center: "From Saturday Jan 11 9pm EST until Monday Jan 13 6am EST the system will be unavailable while we perform system maintenance. We apologize for any inconvenience this necessary maintenance might cause you." Below the notice is a light blue login box containing fields for "User Name:" (with the text "beth.copenhaver@clinigence.r" entered) and "Password:" (with masked characters). There is a link for "Reset / Forget your password?" and a "Login" button.

# The ACO Submission Process

We can submit as many times as needed, but only the final submission is used.

# Loading the Patient File/Patient Assignments

- ▶ Clinigence loads the Sample Beneficiary file.
- ▶ Based on CMS claims data, each patient is assigned to:
  - **1 practice:** The sample TIN is matched to that in the organization census. For TINs with more than 1 practice the sample NPIs are matched against the organizational census NPI to identify the specific practice.
  - **and 1 provider:** The sample NPIs are matched to those in the organization census.
- ▶ Optional: If the practice has integrated its EHR with Clinigence or if the ACO provides alternative data feeds, then that clinical data is used to prepopulate the MSSP Registry.

# The Clinigence Registry

- ▶ The Clinigence MSSP Registry is used to collect and confirm the answers to the clinical questions CMS asks.
- ▶ The tool takes the user through a step-by-step wizard for each clinical domain.
- ▶ The MSSP Registry is updated every year to reflect the latest CMS requirements.

# The Clinigence Registry

## ▶ Accessing the Registry:

1. Login to Clinigence (solution.clinigence.com)
2. Select ACO Tools
3. Select Attributed Registries
4. Select [Q1 2021 ACO Reporting to CMS](#)

## ▶ Setting up Registry Credentials:

1. Login to Clinigence (solution.clinigence.com)
2. Select Configuration
3. Select either:
  - Create Administrator Account (All practices)
  - Create Practice Administrator Account (Single Practice)

Data collection is incomplete for this clinical domain

Data collection is complete and approved for these clinical domains

Data collection is complete but needs to be approved for this clinical domain

Patient is not in sample for this clinical domain

# Consecutive, Ranked Patients

- ▶ For reporting year 2020 CMS is again requiring the ACOs to complete 248 consecutive, ranked patients.
- ▶ If the sample contains fewer than 248 patients for a clinical domain, the ACO must complete 100% of the patients in the sample for that domain.
- ▶ If a patient ranked <248 is “skipped” (Medical Record not found, patient not qualified for measure, Other CMS Reason) then the next ranked patient must be completed.

# Consecutively Ranked Patients

- ▶ In this example, data entry is complete for 292 patients.
- ▶ The number of *consecutively completed* patients is 260 (292 complete – 32 skipped)

# Consecutively Ranked Patients

- ▶ If you complete data entry for *consecutively ranked* patients above the minimum, CMS will include those patients in its performance calculation.
- ▶ If you complete data entry for *non-consecutively ranked* patients above the minimum, CMS will **not** include those patients in its performance calculation.

# Working with the Registry

- ▶ Based on the data in their EMR and/or paper charts users validate pre-populated data and select the answers to questions which are not populated.
- ▶ Sort the list of patients by those with incomplete data to get started.

The screenshot shows a software interface with a header 'Reports' in blue. Below it is a blue button labeled 'Export'. To the right of the button is the text 'Rows containing:' followed by a dropdown menu. The dropdown menu is open, showing three options: 'All', 'Unapproved Groups', and 'Incomplete Data'. The 'Incomplete Data' option is highlighted in blue. Below the dropdown menu is a table with columns labeled 'Match', 'TIN', 'Practice', and 'ID'. The 'Match' column has a small blue icon next to it.

# Sorting the Lists

- ▶ In addition to sorting the rows, you can sort on each clinical domain column.

MRF	CARE	DM	HTN	PREV
All ▼	All ▼	All ▼	All ▼	All ▼
●	✓	All	●	●
●	●	Attributed	●	●
●	●	Not Attributed	●	●
●	●	Incomplete	●	●
●	●	Complete	●	●
●	●	Approved	●	●

- ▶ You can also sort by Practice or Provider.

# Entering the Data

- ▶ Select the patient name and the summary for that patient appears. This shows which clinical domains include the selected patient in the sample and the completeness of the data for each.

Armstrong, Dakota

79 years (9/25/1940)      Patient ID: 21132910  
Male      EMR ID(s):

# Entering the Data

- ▶ Select Edit for the clinical domain you want to update.
- ▶ Each measure group has a series of questions with answer drop-downs.
- ▶ The number of questions for each clinical domain will depend on the answers you select.

The screenshot displays the 'CMS Groups' interface. At the top, there is a header 'CMS Groups' and a link 'Attributed Groups Summary'. Below this, the 'CMS ID: XX59MW3JW21' is shown. A circular progress indicator shows '50%'. A yellow callout box points to the progress indicator with the text: 'As you answer questions the progress indicator updates'. Below the progress indicator, the title 'HTN - Hypertension' is displayed. Underneath, the section '1 Module Rank' is visible. The first question is 'Active HTN diagnosis on or before 7/1/20' with a dropdown menu showing 'Yes'. The second question is 'Most Recent BP Documented During Measurement Period' with radio buttons for 'Yes' and 'No'.

# Entering the Data

- ▶ When all the questions have been answered for a clinical domain, the progress indicator will show 100%.

The screenshot displays a patient record for Armstrong, Dakota, a 79-year-old male with Patient ID 21132910 and EMR ID(s) 42866042. The interface shows the 'Assignment' tab for 'CMS Groups'. A progress indicator for 'HTN - Hypertension' is shown as a green circle with '100%' inside, next to an 'Approved' checkbox. A 'Comments (0)' button is visible, and a 'Save' button is highlighted with a red border. Two yellow callout boxes provide instructions: 'Use the Comments button to record relevant information' and 'Select Save before you leave this screen!'.

# Entering Values

- ▶ Certain questions require you to enter values, such as lab results or vital signs. CMS has provided a range of “valid values” for each item and you will not be able to enter a value that is outside that range.
- ▶ For example, CMS has established a range for systolic blood pressure of 0 to 350. Even if the patient’s most recent BP was 352/200 you will not be able to enter 352.

# Entering Values

beta.clinigence.com says

Systolic must be between 0 and 350

OK

If you enter an invalid value, an error message gives you the acceptable range. In this example, you could enter 350 and add a Comment giving the actual value.

Hover the mouse over the field label to see the range of valid values

**Systolic**

Valid values are any number between 0 and 350.

# DM-2 – Poor Control

For PY2020, CMS guidance is that the HbA1c date drawn must be the most recent test. If there is no result documented for that test, then you should enter 0 in the HbA1c Value field. We cannot upload a blank field to the CMS Web Interface.

CMS Groups

[Attributed Groups Summary](#) > [Edit Group Measures](#) Comments (0)

☒ Yes ☐ No

Date Drawn

09/21/2020

HbA1c Value

Valid values are any number between 0 and 25.

# Entering Dates

- ▶ Certain clinical domains require you to enter a date or date range for an item. Most require that the date falls within the measurement period (Jan. 1, 2020 through Dec. 31, 2020).

### HTN - Hypertension

solution.clinigence.com says

BP Taken Date must be in 2020

OK

/20

#### HTN-2: Controlling High Blood

**Date Taken**

December 2019

Su	Mo	Tu	We	Th	Fr	Sa
1	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	27	28
29	30	31				

# Other CMS Approved Reason

- ▶ Requests to use CMS Other Approved Reason must be manually entered in the CMS Web Interface.
- ▶ Clinigence personnel will handle that task as long as you have selected this option as the answer and given details needed to support this request in the Comments for that specific measure.

# Other CMS Approved Reason

The screenshot shows a web interface for a patient's mental health record. At the top left is a circular progress indicator showing 50%. The title 'MH - Mental Health' is centered at the top, with 'Cancel' and 'Save' buttons on the right. Below the title bar, the text '55 Module Rank' is visible. The main content area is divided into two columns. The left column is titled 'Active Major Depression or Dysthymia Confirmed (12/1/2016 to 11/30/2017)' and contains a dropdown menu currently set to 'No - Other CMS Approved Rea'. The right column is titled 'Major Depression or Dysthymia Confirmation ?' and 'QualityNet Help Desk Ticket ID Covering Approved Reason for This Patient', with an empty text input field below. A vertical scrollbar is on the right side of the form.

- ▶ When CMS approves your reason, Clinigence will add the CMS ticket number to the appropriate field.
- ▶ If CMS rejects the request, Clinigence will remove that answer and notify the ACO.

# Approving the Data

- ▶ As data collection progresses, you can sort by Unapproved Groups to quickly find those patients who need approval.

The data must be entered *and approved* for each clinical domain a patient qualifies for.

# Approving the Data

- ▶ Drill down to the patient and clinical domain and select the Approved box for each clinical domain.

The screenshot displays the Clinigence CMS Groups interface for patient Everett, Rex (68 years, 6/8/1946, Male, EHR ID(s): 15841). The interface includes a 'CMS Groups' header, a 'Comments (0)' button, and a 'Medical Record Found' section. In this section, a green circle with '100%' and a yellow box with a checkmark and the word 'Approved' are visible. Below this, a dropdown menu is set to 'Yes'. The 'Medical Record Confirmation' section is partially visible on the right.

# MSSP Data Entry Reports

- ▶ There are 2 reports available for PY2020 to help you track your progress and compare performance across the ACO.
  - Data Entry Summary Report
  - Data Entry Provider Report
- ▶ These reports are accessible all year, even after the Q1 2021 Registry is locked.

*NOTE: These two reports replace the MSSP Performance Report from previous years.*

# Data Entry Summary Report

- ▶ This report is designed to let the ACO track it's progress in data collection.
- ▶ There is a row per measure that shows the following for data collection:
  - Minimum required patient rank to meet CMS minimum
  - Number of ranked patients with incomplete data
  - Number of patients with complete data (can filter for completed and approved)
  - Consecutively complete (starting at rank #1)
  - Skipped patients

# Data Entry Summary Report

- ▶ The following data is shown for performance:
  - Included in the denominator (Eligible population)
  - Included in the numerator (Meets criteria)
  - Not in Numerator (Does not meet criteria)
  - Performance Rate

*NOTE: Performance numbers are not based on the rank or consecutively completed patients, only those with 100% data completed for that measure. This is a departure from how CMS will calculate the rate.*

# Data Entry Provider Report

- ▶ The Data Entry Provider Report is a new report that is provided in addition to the Summary Report.
- ▶ It was driven by user feedback pertaining to how ACOs like to arrange more detailed information not only for the data entry process, but for their own internal reporting.

Select the number to view the patient list.

# Data Entry Provider Report

- ▶ The Provider report removes the data entry progress columns related to ranking.
- ▶ The Provider report adds columns for Practice, Providers and NPIs.
- ▶ Performance Rates are shown in **Green**, **Orange**, or **Red** based on the thresholds for each measure.
- ▶ As with the Summary report, select any non-zero number to drill-down to a list of those patients.

# Data Entry Provider Report - Filtering

- ▶ The same filters offered for the Summary view are offered for this view: Approved Status and Practice/Provider.
- ▶ Multi-level sorting is offered for this view. All columns in the grid are offered as sorting elements in the sort menu in the order that they appear in the grid.
  - The default sort for this screen is measure, then practice, and then provider all ascending order.

# Data Entry Provider Report - Exporting

- ▶ After you have filtered the report as needed, you can export the report to a .XLSX file. The default sorting is used for the exported report.
- ▶ The practice data appears on the second sheet.

# You're Done Collecting Data – Now What?

- ▶ When the ACO has finished data collection, Clinigence "locks" the registry, essentially allowing access in read-only mode.
- ▶ Clinigence recommends targeting completion for about 2 weeks prior to the CMS Web Interface shutdown (**shut-down for 2021 is March 31, 2021**). This allows the ACO to identify and react to any unexpected submission results such as low scores and make any corrections.

# You're Done Collecting Data – Now What?

- ▶ Clinigence performs the final submission to CMS. Based on this final submission Clinigence provides several supporting pieces of documentation including:
  - MSSP performance and submission reports
  - MSSP final submission exports
  - MSSP claims pre-population exports
  - Clinigence data entry, comments, and diff reports
  - Clinigence files used for the final MSSP submission

# CMS Support Calls

- ▶ CMS Weekly Support Calls will begin **Jan. 27, 2021** and are held each **Wednesday at 1 pm EST** during the collection period.
- ▶ These calls allow ACO personnel to ask questions of CMS subject matter experts.
- ▶ An FAQ from previous years' calls can be found here: [qpp.cms.gov/about/resource-library](http://qpp.cms.gov/about/resource-library)

# CMS Web Interface FAQ

## ► An example from the FAQ...

ID	Question	Answer
3.	When can I use "No - Medical Record Not Found?"	<p>The "No - Medical Record Not Found" option should be used only if there is truly an inability to locate and access the beneficiary's medical record. By virtue of being sampled into the CMS Web Interface, CMS has identified claims for this beneficiary submitted by your organization. CMS expects organizations to make a concerted effort to obtain medical records for their assigned and sampled beneficiaries. This includes collaborating with physicians and/or other clinic staff both inside and outside the organization (including but not limited to the three NPIs provided in the CMS Web Interface), as well as facilities both inside and outside the organization, with such collaboration attempts being repeated throughout the course of the data collection period, if needed.</p> <p>CMS encourages organizations to put systems and processes in place so that patient care is more coordinated for the dual purposes of patient safety and quality improvement.</p> <p>It is likely that data for sampled patients are available from medical records maintained by the organization's providers because sampled patients are those with:</p> <ol style="list-style-type: none"><li>1. The largest share of their primary care services provided by the organization (i.e., they have been assigned to the organization)</li><li>2. At least 2 primary care office or other outpatient visits billed by the organization<sup>3</sup> during the reporting period.</li></ol> <p>"Medical Record Not Found" is not an appropriate response when you are able to locate and access a medical record, but are unable to locate certain data within it. Refer to Appendix B, <a href="#">Table B-1</a> for examples.</p>

# Next Steps

- ▶ The steps required to prepare the Registry for collection will vary by ACO.
- ▶ The key data sources are:
  - Beneficiary Sample Excel file
  - EHR or data feeds for pre-population (optional)
  - CMS-provided influenza immunization answers

# Next Steps

- ▶ The MSSP Registry should be available for collection January 11-20 to March 31. The start date will depend on several factors such as complexity of the organizational census and whether data integration is required.
- ▶ *Clinigence will alert each ACO as their Registry becomes available. You will be notified via email and support ticket.*

# Next Steps

- ▶ The ACO Administrator sets up credentials for all users who will be involved in the data collection.
- ▶ Each ACO schedules a training session for their data collection users. Feel free to use any of the Clinigence MSSP Registry materials on the support site at [support.clinigence.com](http://support.clinigence.com) ([ACO MSSP Registry](#))
- ▶ Each ACO prepares a plan with daily and/or weekly goals for data collection.
